## Election/Restrictions

1. Claims 1-50 are pending in this application.

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, 9-13, drawn to a method in a computer system for monitoring data sent, detecting a request and performing a corrective action, that corrective action comprising changing the destination of the outgoing transfer to the computer system, classified in class 709, subclass 237.
  - II. Claims 6 and 7, drawn to a method in a computer system for monitoring data sent, detecting a request and performing a corrective action, that corrective action comprising encrypting the data before it is sent, classified in class 709, subclass 246.
  - III. Claims 8, 14-24, 38-48, and 50, drawn to a method in a computer system for monitoring data sent, detecting a request and performing a corrective action, that corrective action performed if the amount of data being sent is high, classified in class 709, subclass 235.
  - IV. Claims 25-37, drawn to a method in a computer system for monitoring data sent, detecting a request and performing a corrective action if the data includes personal information, classified in class 709, subclass 232.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I, II, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not

Page 2

Art Unit: 2157

require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention of group I, changing the destination address of the outgoing data to the computer system can work independently of the corrective action of encrypting the data.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Uzma Alam whose telephone number is (571) 272-3995. The examiner can normally be reached on Monday-Tuesday 9 AM - 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on (571) 272-4001.
